Claims 1-15 are pending in this application.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Siegal on 1/20/2006.

Claim 1. (Currently amended) A composition for abating hydrogen sulfide emissions comprising: a combination of Fuller's earth and a metal compound formulated to eliminate at least 0.01 grams of H₂S per gram of composition; a fragrance, benzaldehyde, citronella, eucalyptus and water.

Claim 2. (Currently amended) The method of claim 13, wherein the composition further comprises a fragrance, benzaldehyde, citronella, eucalyptus and water.

New references US 2005/0005869 and US 2005/0175577 are cited to further show the state of the art. Although Fuller's earth is disclosed in both references, combination with a metal compound formulated to eliminate at least 0.01 grams of H₂S per gram of the composition and applying to landfill as claimed in instant independent method claims 12 and 13 is neither disclosed nor fairly suggested.
